COMPANY PROFILE

Since 1992 Window City has built an organization that has become a leader in the extruding and manufacturing of vinyl windows and doors and now we have added the most unique entry door system unmatched in the industry today. Window City is recognized throughout North America for our design excellence, precision craftsmanship and state of the art technology necessary to produce windows and doors that meet the industry’s demanding performance standards. By combining our fully automated window manufacturing capabilities with the latest door technology, Window City has the solutions to all your window and door requirements. Both of our Lifetime Entry Door Collection and Classic Entry Door Collection are truly unique door systems that offer full customization choices from size to themes and hardware, several paint and stain colours and an extensive glass selection. We offer one of the most complete energy efficient products in the industry. Our Solar Solutions glass options are Energy Star™ certified and allow the homeowner the opportunity to customize the comfort, security and performance of every room in their home based on where they live. We are proud of our reputation within the window and door industry. Dealers, builders, architects and remodelers enjoy working with our vast range of products, multiple accessory and option choices plus extensive services and they all rely on Window City’s commitment to excellence.

We consider our comprehensive knowledge of the window and door industry to be one of our greatest strengths. We know the vinyl extrusion process, glass technology, home construction and the renovation industry. This knowledge and in-depth awareness enables us to understand and deliver the products that are needed today, even while we are researching and designing for tomorrow.

EXTRUSIONS

Window City manufactures its own PVC compound made from top quality resin. This allows us to control the quality and consistency necessary to provide some of the most advanced extrusions in the marketplace today.

COMPOUNDING

Window City manufactures its own PVC compound made from top quality resin. This allows us to control the quality and consistency necessary to provide some of the most advanced extrusions in the marketplace today.

AUTOMATED FABRICATION, WELDING AND CLEANING

Precision and quality are the standard for all Window City products. We leave nothing to chance during the manufacturing process. Our automated fabrication centers provide precision cutting and fabrication of the frames, sashes and accessories. Automated 4 point welders and cleaners ensure this consistency throughout the entire product collection, regardless of the size or configuration of your windows or doors.

INSETTED GLASS UNITS

Window City manufacturers all of its own insulating glass units resulting in consistent quality and the ability to offer several performance and security choices with Solar Solutions glass options. Our state of the art automated glass manufacturing system is designed to provide the highest quality sealed units each and every time. Our automated gas fill machines allow us to certify the Argon or Krypton gas fill for each sealed unit we produce.

We offer one of the most complete energy efficient products in the industry. Our Solar Solutions glass options are Energy Star™ certified and allow the homeowner the opportunity to customize the comfort, security and performance of every room in their home based on where they live. We are proud of our reputation within the window and door industry. Dealers, builders, architects and remodelers enjoy working with our vast range of products, multiple accessory and option choices plus extensive services and they all rely on Window City’s commitment to excellence.

We consider our comprehensive knowledge of the window and door industry to be one of our greatest strengths. We know the vinyl extrusion process, glass technology, home construction and the renovation industry. This knowledge and in-depth awareness enables us to understand and deliver the products that are needed today, even while we are researching and designing for tomorrow.
**ENERGY STAR® WINDOWS AND DOORS WILL MAKE A DIFFERENCE IN YOUR HOME.**

Window City’s Solar Solutions glass options provide you with several choices to maximize your energy savings. Whether you are concerned with heating or cooling costs we have you covered. Energy Star® certified products help prevent green house gasses and assist in the conservation of our natural resources. There are several determining factors when selecting a qualified product you need to consider your geographic location in North America because the requirements can vary. Window City authorizes each product with permanent labeling on the spacer bar within the glass and provides an additional government recognized label on the glass.

This commitment to quality goes even further when we apply our gas into the sealed units. The gas is applied right at the time of sealing the unit; this system is one of a kind and allows Window City to certify the gas content in each and every unit. This technology allows us to incorporate the most efficient warm edge system and offer several performance and safety options in our windows and doors.

LoE-i89™

Window City has upgraded our glass with the latest technology. The i89 glass is the perfect cold weather remedy. It provides excellent insulating capability, blocks heat loss to the outside and reflecting heat back into the room plus it allows the winter sun’s heat to pass into the home. The dramatic improvement in comfort from windows with warm glass surfaces also means the relative humidity of the indoor air can be controlled and maintained properly. The better insulated the window glass, the warmer your room will be.

**NEAT® NATURALLY CLEAN GLASS**

Window City introduces NEAT® naturally clean glass. It harnesses the sun’s UV rays to loosen dirt so water can rinse it away, leaving windows virtually spotless. Your windows will stay cleaner longer and will cost less. Homeowners and builders will enjoy the effects that a Neat®-coated window adds to any room. Not only that, because Neat® is applied to Window City’s LoE® coated glazings, homes stay cooler in the summer and warmer in the winter.

**i89 GLASS**

Window City introduces LoE-i89™ our new energy-saving surface coated glass. This new coating will be found on the inside surface (room side) where it reflects the escaping heat back into the room, lowering U-factor and meeting the toughest energy guidelines as well. Coupled with our LoE® glass and argon fill, this double pane unit delivers near triple pane performance. What’s more, LoE-i89™ enhanced performance glass is easy to clean and there is no haze to mar the view allowing more light to come into the room.

**SOLAR SOLUTION OPTIONS**

**DOUBLE PANE**

Double strength glass is standard in our insulated units along with LoE®-180® and Super Spacer. All units are certified and Energy Star compliant.

**LAMINATED GLASS**

Tri-Pane Safety Vision™ laminated glass is produced by bonding a combination of plastic single layers and polyester film between two panes of glass pressed into a single sheet. The pane of laminated glass completes the sealed unit. Laminated glass provides maximum safety from breakage, sound transmission and blocks 95% of damaging UV rays.

**TRIPLE PANE**

Triple pane consists of two layers of LoE® coated glass with an interior glass substrate, which creates two insulating chambers. These chambers can be filled with argon (R6), an argon and krypton mix (R7.5) or krypton only (R9) gas. Triple pane will provide maximum R-values, reduced sound transmission and 95% UV blockage, all in one unit.

**PRODUCER RATINGS**

Window City products are Energy Star® certified, and tested for AAMA and WDMA/CSA. For individual product rating and thermal performance rating please visit: windowcity.com
Traditional designs meet modern day technology in our Heritage Collection of casement, awning and fixed windows. Our engineers have taken the classic contours of a hand crafted wood window and combined them with the performance and durability of vinyl. The Heritage Collection will bring that timeless beauty to your home and add value without sacrificing quality.

Our 3 ¼” fusion-welded frame and sash offer superior strength. Our standard hardware uses a Premium Hardware crank and a multi-point lever lock for ease of operation and security with eight different crank color choices available.

Our standard unit is double-strength glass which comes with our warm edge S-Class super spacer with the option of triple pane glass with Argon, Krypton or a mix of Argon/Krypton gas.

**HC-101 CASEMENT**

Casement windows offer top to bottom unobstructed views, structural integrity and side open ventilation. They are hinged on the side so the sash swings outward either left or right depending on your needs. These windows open up to 90 degrees so you can easily clean both sides of the glass from the inside plus you can also remove our easy-clean screen for simple cleaning.

**HC-126 AWNING**

Averting windows allow the window sash to swing out and upwards and are typically hinged at the top. Our Averting windows open up to 45 degrees from the bottom letting air circulate freely, while providing a unique protective shield to keep rain out and come with an easy-clean removable screen.

**HC-176 CASEMENT**

Casement Fixed windows do not open and are designed with a structural frame to accommodate larger openings. The classical contours of the frame are designed to match the size and appearance of our casement and awning windows for an attractive and uniform look and operational versatility for your home.

**FIXED HC-151 SLIM-FIXED**

This Slim-Fixed window does not open but comes with a sash profile design and a narrow frame to create a distinctive look and also maximizes the glass viewing area. Slim-Fixed windows can be ordered in an unlimited range of architectural shapes and curves to make custom design creations possible and incorporates structural and thermal chambers for superior strength in large openings.
The Heritage Collection of Hung and Sliding windows combine the classic look of a heritage window with today’s technology and performance. The attention to detail continues with contoured sashes and frames recreating the hand crafted wood look.

Our 3 ¼” fusion-welded frame and sash offer superior strength plus a full aluminium reinforced interlocking sash to maximize security. We use a constant force stainless steel balance system to ensure smooth operation of the movable sections. Our standard flush mounted low profile locks provide an unobstructed view with eight different Premium Hardware colour choices available.

Our standard unit is double-strength glass which comes with our warm edge 5-Class super spacer with the option of triple pane glass with Argon, Krypton or a mix of Argon/Krypton gas.

Heritage Plus Collection has the added advantage of strategically located High Density Expanded Polystyrene Foam (EPS) inserted into the profile cavities of the window. This system enhances the overall performance of the Heritage Collection windows by adding stiffness and reducing noise transmission through the frame and it increases the overall Thermal Resistance of the windows. As a result, you get a window that is stronger, more resilient to any impact, quieter and more thermally efficient from both cold heat or air transfer and it is environmentally safe.

FEATURES
- Stronger window
- More resilient to impacts
- Quieter, reduces noise transmission
- More thermally efficient from cold, heat or air transfer
- Environmentally safe

The Heritage Plus is available on our:
- HC-101 Casement
- HC-126 Awning
- HC-155 Sliding Fixed
- HC-210 Single Hung Tilt Pocket Sill
- HC-230 Single Sliding Pocket Sill
- HC-260 Double Sliding Tilt
- HC-261 Double Hung Tilt Pocket Sill

HERITAGE MAXIMUM COLLECTION

The attention to detail distinguishes the Heritage Maximum Collection of casement, awning and fixed windows, creating beautiful vistas throughout your home. Unlike any other window, our traditional design combined with modern day technology has resulted in quality and performance second to none.

Our 4½” fusion-welded frame and sash offer superior strength. This is the slimmest profile in the industry today and has 40% less frame obstruction creating expansive views and increased daylight in any opening. Heritage Maximum windows come with Premium Hardware for effortless operation with eight different colour choices available plus a multi-point locking system to create a tight seal and provide greater security.

This collection comes with double-strength glass and our warm edge S-Class super spacer with the option of triple pane glass with Argon, Krypton or a mix of Argon/Krypton gas.

First of Its Kind

Heritage Maximum Series: Casement, Awning, Fixed

HC-401 CASEMENT
Casement windows offer top to bottom unrestricted views, structural integrity and side open ventilation. They are hinged on the side so the sash swings outward either left or right depending on your needs. These windows open up to 90 degrees so you can easily clean both sides of the glass from the inside plus you can also remove our easy-clean screen for simple cleaning.

HC-426 AWNING
Awnings windows allow the window sash to swing out and upwards and are typically hinged at the top. Our Awnings windows open up to 45 degrees from the bottom letting air circulate freely, while providing a unique protective shield to keep rain out and come with an easy-clean removable screen.

HC-476 CASEMENT FIXED
The Casement Fixed windows do not open and are designed with a structural frame to accommodate larger openings. The classic contours of the frame are designed to match the size and appearance of our casement and awning windows for an attractive and uniform look and operational versatility for your home.

HC-451 SLIM-FIXED
This Slim-Fixed window does not open but comes with a low profile design and a narrow frame to create a distinctive look and maximize the glass viewing area. Slim-Fixed windows can be ordered in an unlimited range of architectural shapes and curves to make custom design creations possible and incorporates structural and thermal chambers for superior strength in large openings.
Window City’s exclusive Classic Collection of casement, awning and fixed windows incorporates superior structural integrity along with quality and unmatched performance.

Our 3 ¼” fusion-welded frame and sash offer superior strength. Our standard hardware uses a Premium Hardware crank and a multi-point lever lock for ease of operation and security with eight different colour choices available.

Standard unit is double-strength glass which comes with our warm edge E-Class super spacer with the option of triple pane glass with Argon, Krypton or a mix of Argon/Krypton gas.

Hung windows are a traditional style of window found in many homes where the bottom sash slides up to open the window and the top sash is fixed. The sash also tilts in to permit easy exterior cleaning from the inside plus it comes with a removable easy to clean half screen.

Double Hung windows can open from the top or bottom with an upper and lower sash that slide vertically past each other in a single frame allowing more flexibility in ventilation. This is a window style commonly seen in many elegant homes. Both sashes also tilt in to permit easy exterior cleaning and the window comes with a removable easy to clean full screen.

Our Single Slider window has only one sash that slides horizontally within the frame with the other sash fixed. The normal slide is from left to right (viewed from the outside) but the opposite slide is available (must be specified when you order) and the sash tilts in for easy exterior cleaning. This window comes with a half screen that is on the opening end and operation only and is removable for easy cleaning.

Our Double Slider window has both sashes that slide horizontally within the frame and are perfect for a large window area where maximum ventilation is required without obstructing the view. Both sashes move and tilt in for easy exterior cleaning from the inside and the opposite sash is removable for easy cleaning.
Window City’s exclusive Classic Collection of single or double slider windows incorporates superior structural integrity along with quality and unmatched performance.

Our frame and sash are fusion-welded offering superior strength plus we use a multi-chambered design which insulates and prevents condensation. We have fully interlocking sashes to maximize the security and minimize air infiltration and they glide on a dual roller system for smooth opening and closing.

Standard unit is double-strength glass which comes with our warm edge S-Class super spacer with Argon, Krypton or a mix of Argon/Krypton gas.

### WC-300 Single Slider
- **Frame and Sash**: Fusion-welded frame and only one sash that slides horizontally within the frame, with the other sash fixed.
- **Operation**: Normal slide is from left to right (viewed from the outside) but the opposite side is available (must be specified when you order) and the sash lifts out for easy exterior cleaning from the inside.
- **Screen**: Half screen on the opening end.

### WC-325 Single Slider
- **Frame and Sash**: Standard fusion-welded frame and only one sash that slides horizontally within the frame, with the other sash fixed.
- **Operation**: Sash tilts in for easy exterior cleaning from the inside and also lifts out.
- **Screen**: Half screen on the opening end.

### WC-350 Double Slider
- **Frame and Sash**: Standard fusion-welded frame and both sashes slide horizontally within the frame.
- **Operation**: Both sashes move and lift out for easy cleaning of both sides.
- **Screen**: Full screen is also removable.

Casement windows offer top to bottom unobstructed views, structural integrity and side open ventilation. They are hinged on the side so the sash swings out and upwards, which can be controlled on your needs. These windows open up to 90 degrees so you can easily clean both sides of the glass from the inside plus you can also remove our easy-clean screen for simple cleaning.

Awning windows allow the window sash to swing out and upwards and are typically hinged at the top. Our Awning windows open up to 45 degrees from the bottom letting air circulate freely, while providing a unique protective shield to keep rain out and come with an easy-clean removable screen.

Casement Fixed windows do not open and are designed with a structural frame to accommodate larger openings. The classic contours of the frame are designed to match the size and appearance of our casement and awning windows for an attractive and uniform look and operational versatility for your home.

This Slim-Fixed window does not open but comes with a low profile design and a narrow frame to create a distinctive look and also maximizes the glass viewing area. Slim-Fixed windows can be ordered in an unlimited range of architectural shapes and curves to make custom design creations possible and incorporates structural and thermal chambers for superior strength in large openings.
Sophisticated curves, arches, circles and other geometric shapes, plus a willingness to accommodate the creative demands of the most demanding home designers keeps architects coming back consistently to Window City for windows that are more than mere windows. Many of North America’s most distinctive homes feature windows fashioned by us. Yes, we have standard shapes but we are highly regarded for our ability to create customized shapes and window configurations. We have an unlimited range of architectural shapes and curves which open up innovative design possibilities. The added advantage of our unlimited grille options can turn any window architectural concept into reality. Our Architectural Series windows can be used in new construction or as replacement windows. Despite the attention to design, our Architectural Series windows do not neglect the durability and energy efficiency features built into all Window City windows.

Windows City uses patented PVC mullions with steel reinforcement which add strength, performance and security. This allows us to produce much larger window units with a mix of both fixed and operating windows.

Bay Windows

Bay windows are much desired by homeowners because of the way they project outwards to extend a home, creating more living space. From the interior they can become a graceful, sunny place in the home and provide a panoramic view. From the exterior, they offer a welcoming, decorative and architectural touch. Bay windows can be varied and they can be the primary front living room window or can be used as a side window to accent an entrance or a corner projection. Bay windows can extend the living space in the home. The beauty of Bay windows can be greatly enhanced by our grille options and our accessory items. The durability and energy efficient features found in all Window City windows apply to our Bay windows. All Bay windows must be custom-built to specific applications.

Bow Windows

Bow windows are welcomed by homeowners and frequently called for by architects because of their grand, sweeping curves that can turn a standard window opening into an appealing architectural enhancement. Bow windows are projection windows that have the benefit of adding space to a home. They do not project outward as far as Bay windows and have more glass panels and softer, more rounded angles. Bow windows extend from the interior and they project outward like a series of protruding ribs, thus extending the creation of a very picturesque setting in the home, one that allows for a magnificent exterior view. For fresh air circulation and temperature comfort, any or all sections of our Bow windows can be made operable by adding any of our operating system options. They have all the strength and durability features built into every Window City window. Every Bow window is custom-built and therefore must be custom-built to the specifications of the space where it is to be installed.

Architectural Shapes
All Window City products can be customized to meet your exact application requirements with our extensive accessory options that are factory applied and fully integrated into your windows. The possibilities are endless with either standard or custom-interior and exterior accessories. We at Window City manufacture our own accessories ensuring a perfect fit and finish for all of our products. Our accessories are fully functional for your application and add detail to your windows.

**Exterior PVC Brickmould trim.** Details replicate the traditional exterior window and door components. Reminiscent of hand crafted windows and doors.

**Interior PVC Trim packages.** Custom made for your windows and doors to create the ultimate precision finishes.

**WINDOW CROSS SECTION WITH TRIM ACCESSORIES:**

The Ultra Patio Door Sliding Collection from Window City allows you to invite the outdoors into your home without sacrificing comfort or security. Ultra Sliding doors are not just for patios these days, they are at home in any room. Brighten your home with endless natural light and the beauty of the outdoors. The classic sight lines and ease of operation combined with several colour options allows this door to fit anywhere in your home. If you desire to add a patio door, Window City’s Ultra Patio Door is available with all the necessary interior and exterior trim options to finish the job.

The Window City Ultra Patio Door Sliding Collection is available in standard 5’, 6’ and 8’ two-panel models as well as 10’, 12’ and 16’ four-panel units. The insulated kick plate option adds a distinct architectural flavour to your home. The Ultra Patio Door Sliding Collection can be combined with several custom sidelites, transoms, grille and glass options. Custom sizes are available through our automated manufacturing facility.

The patio door as shown comes standard with PVC mullion including steel reinforcement (sidelites and transoms included) for additional strength and performance.

**SOLAR SOLUTION OPTIONS**

Our glazing options provide you with maximum energy efficiency in all 4 seasons. Regardless of the climate you live in or the style of door you choose, our Solar Solutions glass options can be selected to customize each room and provide the safety and performance you require.

Tempered glass is standard on the Ultra Patio Door Sliding Collection from Window City. All Ultra Patio doors come standard with tempered glass in the double and triple glazed options.
Our Ultra Patio Door Swing Collection incorporates superior structural integrity along with quality and unmatched performance with our exclusive all uPVC and aluminum reinforced frame system. A truly unique door system that offers full customization from size, hardware, colour, accessories and an extensive glass selection.

Ultra Patio Door Swing Collection frames and sashes are welded on all four corners which guarantee an airtight seal and a perfectly square doorframe every time and can be combined with sidelites and transoms to create an entrance truly customized for you.

The structural reinforcement is strategically positioned to strengthen key areas of the frame that support the adjustable hinges and the standard multipoint hardware. The system is designed with a patented fully weeped sill with offset covered drainage channel is available with clear aluminum anodized or dark bronze finish.

Window City uses a patented PVC mullion including steel reinforcement (sidelites and transoms included) for additional strength and performance.

LEVER SET STYLE & SERIES

Our 9" long hardware is available in the Capri, Torino, Venice or Allegro Series lever set style and are offered in four elegant finish options. The Venice series is standard while the other series may require longer delivery time. Your doors will function and perform beautifully for years to come with our automatic locking system.

Our 12" long hardware is available in three finishes: Black, Satin Nickel and Antique Brass.

STANDARD ADJUSTABLE HINGES (2D)

2D hinge design incorporates a snap feature allowing the parts to easily snap into the panel leaf with a great advantage in the door hanging process. The system comes in a vertical adjustment as well as a horizontal adjustment hinge. Available in multiple finish options.

AUTOMATIC MULTIPONTLOCKING

Our Lever handle set provides privacy and security with our automatic locking system.

Standard Features and Benefits:
- European technology in a North American Lock
- By simply closing the door the upper and lower ¾" (290mm) latches will instantly engage
- By turning the key from the outside or the knob from the inside, it will engage the 1" central deadbolt and lock the top and bottom latches to become a 3 deadbolt locking system.

Our Lifetime Entry Door Collection incorporates superior structural integrity along with quality and unmatched performance with our exclusive all uPVC, aluminum reinforced frame system. The frames are welded on all four corners which guarantees an airtight seal and a perfectly square door frame every time. The structural reinforcement is strategically positioned to strengthen key areas of the frame for added strength and stability. All of the interior and exterior trim accessories are available and match perfectly with our window products.

The Lifetime Entry Door Collection is a fully customized entry system accommodating several door options, including Steel, Fiberglass (Smooth and Textured) or Engineered Wood. Sidelites, transoms, decorative glass, hardware, paint or stain to create the best looking entry door to suit your beautiful home.

Window City’s Classic Entry Door Collection has been built with care using the latest innovations in today’s door construction technology. This entry door collection is available with a variety of frame systems which satisfy customer requirements. Like traditional doors they come with solid wood frames (finger joined pine wood, white oak and mahogany as well as solid composite with a stainable oak woodgrain). For customers who prefer a low maintenance frame system, Window City offers the solid finger joined wood frame with an exterior vinyl wrap in various finishes (white, sandalwood, sandstone, dark bronze and black) with the inside in finger joined pine (unfinished). Also, we offer the same solid wood frame with an interior white vinyl wrap with the exterior in your choice of white, sandalwood, sandstone, dark bronze or black.

The Classic Entry Door Collection is a fully customized entry system where you can choose from several panel options including Steel, Fiberglass Smooth and Textured or Engineered Wood. There are many styles, options and accessories to choose from including sidelites, transoms, decorative glass, hardware, paint or stain to create the best looking entry door to suit your beautiful home.
The Elegance steel doors feature the strength of steel with classic door configurations. High-definition decorative panel profiles create outstanding details that replicate the appearance of a high-end wood door that add style and distinction. The lock area is reinforced with a lock block to provide a solid mounting surface and high-performance composite material is utilized on all bottom rails to resist rotting. The Elegance Steel door has a smooth, pre-finished white surface that requires no additional finishing or you can choose to have a custom colour painted to complement your home’s exterior. There are several designer glass selections available to add beauty and distinction to your entry doors.

For the look and feel of traditional wood doors with minimal maintenance our Citadel Entry Door Series offers several fiberglass panel and sidelite options. Choose from a smooth surface ready for painting or several Oak and Mahogany grains that can be stained to provide the look and feel of real wood. Fiberglass panels are more durable and insulate better than steel and will withstand a wide range of temperatures while still maintaining their fit and finish for years to come. There are several designer glass selections available to add beauty and distinction to your entry doors. Our multipoint hardware will increase the performance and security of your door and we provide multiple finish options to complement your entry system.
Citadel Entry Door Series

For the look and feel of traditional wood doors with minimal maintenance, our Citadel Textured doors offer a great combination of Oak or Mahogany grain, the real wood door appearance but with the long-lasting performance of our superior fiberglass.

Castle Gate Entry Door Series

Nothing beats the richness of wood its splendor and natural beauty bring elegance and warmth to any home. CNC machining along with mortise and tenon construction ensure a quality fit and finish for your Castle Gate Entry Door Series. Door panels are available in Mahogany and Oak. Our multipoint hardware will increase the performance and security of your door and we provide multiple finish options to complement your entry system.

ENgineered Wood Panel

STANDARD FEATURES

VERTICAL CROSS SECTION - WOOD PANEL

1 3/4" ENGINEERED STILE & RAIL WITH 3 PLY PANELS AVAILABLE IN MAHOGANY AND OAK.
Our Barrington Series offers the essence of luxury using timeless designs which complement almost any décor and offer long-lasting performance.

Window City’s Craftsman styled doors bring the beauty of hand-crafted premium rift-cut oak or ‘old growth’ mahogany with the durability and ease of our low maintenance premium fiberglass.

Our Sierra series is designed with a rustic flair. The series incorporates gentle arches and beautiful ‘old-growth’ mahogany texture. Our Flagstaff Series features ribbon-striped mahogany texture and soft planking lines to create a more contemporary look that finishes easily, both use our low maintenance premium fiberglass.

Window City’s AvantGuard series is the ideal fusion of wood and fiberglass. Some would call a beautiful wood door with little or no maintenance a dream. We call it Avant Guard and unlike any other door it perfectly blends beauty and durability into one patented package by combining the aesthetics of wood with the durability of fiberglass.
